SUMMARY

Following ventures into Substance Abuse, which included interning as well as maintaining a full-time job following graduation, I made a decision to go after something I have always had a strong passion for. Technology. I am currently a Senior at Winston Salem State University, working toward my bachelors/masters in Computer Science Information Technology. I have obtained skills and knowledge around Java programs, which included algorithmic development and problem solving, as well as the basic fundamentals of the internet and web designing using HTML and CSS coding. We have briefly explored MARS and MIPS along with 2D game designs using UNITY as well as some exposure to PYTHON. I am more than eager to increase my knowledge and experience in the technology field as a whole and begin my journey into the world of technology.

EXPERIENCE

Coursera (KR Scholars Fall Cohort 2025) (Sept 2025-Jul 2026)

- Currently enrolled in Cybersecurity course focused on the fundamentals and guidelines necessary to obtain and effectively utilize the Google Cybersecurity Certificate following completion.
- Learning how to recognize and address internal and external threats along with threat actors malware and viruses that could potentially destroy or have access to sensitive and protected personal information

Information Technology Student (2023-Dec 2026)

- Discovering the structure and functionality of the Internet and software that exploits it.
- Utilizing languages such as Java to create functioning programs, CSS and HTML along with web developing tools like visual studio code and chrome dev tools. Running MARS and MIPS to successfully execute and run a guessing game program.
- Using javascript and html coding to create problem solving technologies and programs.
- Creating 2D games using Unity adding scripts as well as sprites to effectively run "Hero/Enemy" games.
- Some exposure to MIPS and MARS.

Substance Abuse Counseling (2022-2023)

- Working in a steady paced environment providing therapeutic interactions to individuals during their time in recovery.
- Provided drug screens as well as medication management.
- Collaborated with coworkers to provide adequate assistance as well as support to those in need during the recovery process.
- 2 yrs experience in the recovery process starting at intake to discharge processes along with the stay at halfway houses.
